Summary

I am an enthusiastic developer specializing in backend technologies, with a solid grasp of Java, Spring Boot, and SQL. My experience in working with distributed systems and middleware platforms, though not extensive, is complemented by a strong eagerness to learn and adapt in dynamic environments. Collaborating effectively within agile frameworks, I thrive in teams focused on creating scalable, high-performance solutions. Always keen to master new skills, I embrace challenges as opportunities for growth.

Employment History

Technology Consultant

Valcon

September 2023 – February 2024

- Implemented features for web products using Java, Spring Boot, Typescript, and Angular, enhancing both front-end and back-end development.
- Executed rigorous unit and integration testing to ensure robustness, utilizing JUnit and Mockito.
- Employed Sonar Lint and Cube efficiently to improve code quality by minimizing code smells.
- Optimized SQL database performance through strategic indexing and maintained database migrations with Flyway.
- Applied Agile methodologies including Kanban and Scrum for effective project management.

Java Developer

Sparta Global

January 2023 – July 2023

- Contributed to the development of RESTful API servers managing employee databases using Spring Boot, with a focus on Java, Javascript, and SQL.
- Exercised leadership as a Scrum Master, facilitating communication and task allocation using Kanban.
- Supported Agile, Kanban, and Scrum practices to enhance team efficiency.
- Designed and executed test scenarios to validate application logic using JUnit and Mockito.

Full Stack Developer

Infosys

Oct 2021 – Oct 2022

- Developed a full-stack web application as an organizational tool, applying JavaScript, HTML, CSS, Bootstrap, and Spring Boot.
- Collaborated with stakeholders, ensuring successful delivery through Agile, Kanban, and Scrum methods.
- Managed application lifecycle utilizing Java and SQL effectively.

Java Developer

QA Consulting

Feb 2021 – Oct 2021

- Developed an inventory management system using Java and contributed to a full-stack music library web application.
- Engaged in team collaboration and stakeholder communication to deliver effective solutions.
- Utilized testing frameworks such as JUnit and Mockito for application reliability and performance metrics.

Education

Post-Graduate Diploma in Computer Science, Birkbeck University (2021-2022)

BEng in Mechanical Engineering, Brighton University (2013-2016)
