

Summary

I am an enthusiastic full-stack developer with solid experience in Java, Spring Boot, SQL, HTML, CSS, JavaScript, and TypeScript. Proficient in modern frontend frameworks like AngularTS and ReactJS, I build scalable, user-friendly applications from backend to interface. I thrive in agile environments, collaborate effectively across disciplines, and continuously seek to learn, adapt, and deliver high-performance, maintainable solutions.

Skills

- Java
  - Spring Boot
  - SQL
  - Multi-threading
- JUnit
  - Mockito
  - Agile
  - HTML
- CSS
  - JavaScript
  - Typescript
  - Angular
- React
  - Scrum
  - Problem Solving
  - Integration Testing

Employment History

Front End Developer

July 2025 - present

Uranion

- Created and maintained a high-performance website using TypeScript, Angular, HTML, CSS, and libraries like Angular Materials and Tailwind CSS, focusing on responsiveness and user experience optimization.

Technology Consultant

September 2023 – February 2024

Valcon

- Integrated front and back-end features in the client's web product using TypeScript, Angular, Java, and Spring Boot to enhance functionality.
- Executed unit and integration testing with JUnit and Mockito to ensure robustness and reliability.
- Implemented database optimizations for improved performance using indexing and managed migrations with Flyway.
- Utilized project management methodologies like Agile, Kanban, and Scrum to deliver client-focused solutions.

Java Developer

January 2023 – July 2023

Sparta Global

- Contributed to developing and maintaining RESTful APIs for employee management systems using Java and Spring Boot, ensuring efficient data handling.
- Led teams as Scrum Master, fostering effective communication, organization, and problem-solving during Agile, Kanban, and Scrum processes.

Full Stack Developer

Oct 2021 – Oct 2022

Infosys

- Developed a full-stack web application as a personal organizational tool using JavaScript, HTML, CSS, Bootstrap, and Spring Boot, collaborating closely with stakeholders to align with user needs.
- Applied Agile methodologies to ensure timely and efficient delivery of project milestones.

Java Developer

Feb 2021 – Oct 2021

QA Consulting

- Engineered an inventory management system using Java and performed thorough server-side testing with Mockito and JUnit to ensure system integrity.
- Participated in the development of a full-stack music library application, collaborating with teammates and stakeholders to integrate user feedback.

Research Intern

Nov 2017 – Feb 2018

Wirexapp

- Conducted comprehensive research on the cryptocurrency market and competitors to inform strategic decisions.
- Developed a chatbot for group moderation to enhance communication efficiency.
- Advised customers on identifying and avoiding potential crypto scams and fraud.

Customer Service Specialist

Feb 2017 - Sep 2017

Tesco

- Managed stock levels effectively in the produce section, ensuring availability and operational efficiency.
- Trained in operating tills to provide efficient customer service in high-volume environments.

Engineering Trainee

Jun 2014 - Aug 2014

Egypt Air

- Engaged in the maintenance and repair of commercial airliners, gaining technical knowledge and hands-on experience.
- Collaborated with engineering teams to ensure compliance with safety standards.

Developer

Not specified

Personal project

- Developed a Bouncing Bomb Simulator for Android utilizing Java and LibGDX, demonstrating innovation and technical proficiency.

Education

BEng Mechanical Engineering, Brighton University (2013-2016)

Post-Graduate Diploma Computer Science, Birkbeck University (2021-2022)
